

Executive Summary

This dataset contains 274 rows and 8 columns, with 3.51% missing values overall and 14 duplicate row(s).

Data Quality

Rows: 274
Columns: 8
Missing (overall): 3.51%
Duplicate rows: 14
Memory usage: 130.3 KB

Key Findings

Fact-checked against the data: 1 finding(s) confirmed, 1 unconfirmed - verify before citing.

- 1. The average founding year across all startups is 2016.4, showing a recent cohort skew. [VERIFIED]
- 2. E-commerce is the leading sector, with over 900000 total companies tracked. [UNCONFIRMED - verify before citing]
- 3. Chennai has the highest concentration of startups in this dataset.

Recommendations

- 1. Address missing values in the columns with the highest missing percentage before further analysis.
- 2. Remove duplicate rows to avoid double-counting in aggregate metrics.
